TourTurf® FS Activo

Flexible Solution

Oxide: 4-0-6 + 0.5 % Fe

Economic supply of organic nutrients for active soil microbes and strong, resistant plants.

TourTurf® FS Activo is an organic liquid NK-fertiliser for turf, approved for organic farming. In addition to organic NK, the product contains carbohydrates, amino acids, vitamins, bioactive substances as well as macro- and micronutrients that stimulate the soil's microflora so that the plants become healthy, strong and resistant to pests and fungal diseases.

The product is approved for organic farming consists of yeast vinasse, 2% organic sugarcane molasses and 10% seaweed extract. This viscous 100% organic fertiliser typically has an organic NPK content of 4% nitrogen (N), 0.2% phosphorus (P_2O_5) and 6% potassium (K_2O).

The fertiliser has a natural content of the micronutrients iron, boron, chromium, copper, iodine, molybdenum, manganese, sodium, selenium and zinc. In addition, the fertiliser contains several macronutrients: nitrogen, phosphorus, potassium, sulphur, calcium and magnesium.

The product can be applied with any type of sprayer. The fertiliser must be mixed with water in a minimum ratio of 1:30. We recommend using spray nozzles for larger droplets.
