TourTurf® FS Micro Pack

Flexible Solution

Oxide: 2-0-0 + Micronutrients

Optimal supply and absorption of micronutrients and trace elements.

TourTurf® FS Micro Pack Liquid 2-0-0 + micronutrients is a mineral liquid N-fertiliser with micronutrients for turf on golf courses and sports fields. The fertiliser ensures controlled growth, a healthy green colour, alleviates nutrient insufficiencies and improves grass health.

The TourTurf® FS Range includes fertilisers that provide balanced growth, produce vital grasses and pH control of the tank-mix. The use of these products ensures optimal supply and absorption of macronutrients, micronutrients and trace elements. An economical solution for optimal use of nutrients, without any leaching losses or negative environmental impact.

The fertiliser can be used throughout the growing season. You can optionally add biostimulants such as seaweed, humic acid and amino acid products. Always check mixability first. A jar test will help you to ensure the compatibility of different products.

This product can be applied with any type of sprayer. The fertiliser must be mixed with water in a minimum ratio of 1:4. We recommend using spray nozzles for larger droplets.

Guaranteed content

Total nitrogen (N)	2.0%
- of which urea (N)	2.0%
Phosphorus (P_2O_5)	0.48%
Sulphur (SO_3)	4.40%
Magnesium (MgO)	4.14%
Manganese (Mn)	1.00%
Iron (Fe)	1.00%
Copper (Cu)	0.03%
Zinc (Zn)	0.02%
Boron (B)	0.0002%
Molybdenum (Mo)	0.0002%

pH: 1.5
Density: 1.2
Nozzles: Spray nozzles for larger droplets.

CE

Application

Use monthly during growing season.

50-100L/ha mixed in 200-600 L water.

Synergy with PHB & ECO Respond®

Order number

50702/LITER
1000L
