# TourTurf® Sport & Park Trees

Oxide: 10-4-8 + 3 % MgO - Fairway Grade

## Even growth for larger turf areas and plants.

TourTurf® Sport & Park Trees 10-4-8 is an organic-mineral NPK-fertiliser with a high content of magnesium. The granulated fertiliser is a good all-round product for larger sports turf areas like fairways and football pitches, but can also be used as a fertiliser for trees, parks and landscaping.

This formulation is ideal for users who wish to use a sustainable and affordable fertiliser. The organic matter in the product will provide the soil with important trace elements and vitamins.

This will interact with the soil microbial life and stimulate the biological activity in the soil and release nutrients for the plants.

The benefits for the soil profile will only be enhanced by continuous use of organic fertilisers. It will promote a healthy ecological balance and secure an even growth throughout the growing season.

The added magnesium in the product will make the turf look dark green. The nutrients in mineral form and those contained in the organic material will benefit the soil, trees, plants and turf.

### Guaranteed content

Total Nitrogen (N) .....	10.0%
- of which organic nitrogen (N) .....	4.5%
- of which Ammoniacal (N) .....	2.0%
- of which Ureic (N) .....	3.5%
Phosphorus (P <sub>2</sub> O <sub>5</sub> ) .....	4.0%
Potassium (K <sub>2</sub> O) .....	8.0%
Magnesium (MgO) .....	3.0%
<b>Other elements:</b>	
Organic matter .....	47.0%
Circular content .....	72.5%

pH: 7

The product is low in chlorine.

### Application

2-3 times a year.

300kg/ha.

Size 2-4mm.  
SGN 330.

### Order number

32001NG  
39 x 20kg bags per EUR pallet
