TourTurf® TFC Resiliency Turf Food Concentrate + PTC

Oxide: 5-2-8 + 1.2 % Fe

Organic controlled release liquid fertiliser with natural plant sugars, amino acids and micronutrients.

TourTurf® TFC Resiliency 5-2-8 Turf Food Concentrate + PTC is an organic foliar NPK-fertiliser for turf designed for quick leaf and soil uptake of nutrients under challenging environmental conditions. The fertiliser is formulated from plant-based raw materials with a natural surfactant for better leaf uptake.

TourTurf® TFC Resiliency contains a good combination of natural plant-based input such as amino acids, complex carbohydrates, vegetable-based phosphorous and seaweed extracts.

The natural surfactant ensures that all nutrients stay on the leaf surface and allows a stable and constant release of nutrients into the leaves even at a high temperature and humidity.

The natural micronutrients ensure that the nutrients are available for the plant.

The micronutrients are designed to compensate for micronutrient deficiency in the plant and help with the physiological process.

Guaranteed content

Both complex carbohydrates, seaweed and the organic matter stimulates the natural microbial soil life to benefit the turf plant. The product is approved for organic farming.

Total nitrogen (N)	5.0%
- of which Organic Nitrogen (N)	5.0%
Phosphorus (P ₂ O ₅)	1.9%
Potassium (K ₂ O)	8.4%
Iron (Fe)	1.1%
Sulphur (SO ₃)	5.3%
Magnesium (MgO)	0.6%
Calcium (CaO)	0.7%
Micronutrients	0.6%

PTC*

pH: 4.8

Density: 1.16

Nozzles: Spray nozzles for small droplets.

*The product contains TourTurf® PTC. For more information, please see the datasheet or locate the product in the catalogue.

Application

Use when needed.

20-40L/ha mixed in 300-600 L water.

Synergy with PHB, MBP & other TFC products
